

## package for small radio stations with max. 8 workstations

DABOLino is a complete product for radio stations with a broadcasting studio and up to 8 workstations. It includes modules for planning, production and playout as well as a database with the appropriate tools. DABOLino also supports external systems by providing comfortable interfaces for easy integration (editing system, music planning, advertisement planning). Professional client support is guaranteed using the request ticket system "SOHARD Support Center". Additional support services are also offered within a complete contract.
